3D Nursing VR Simulator
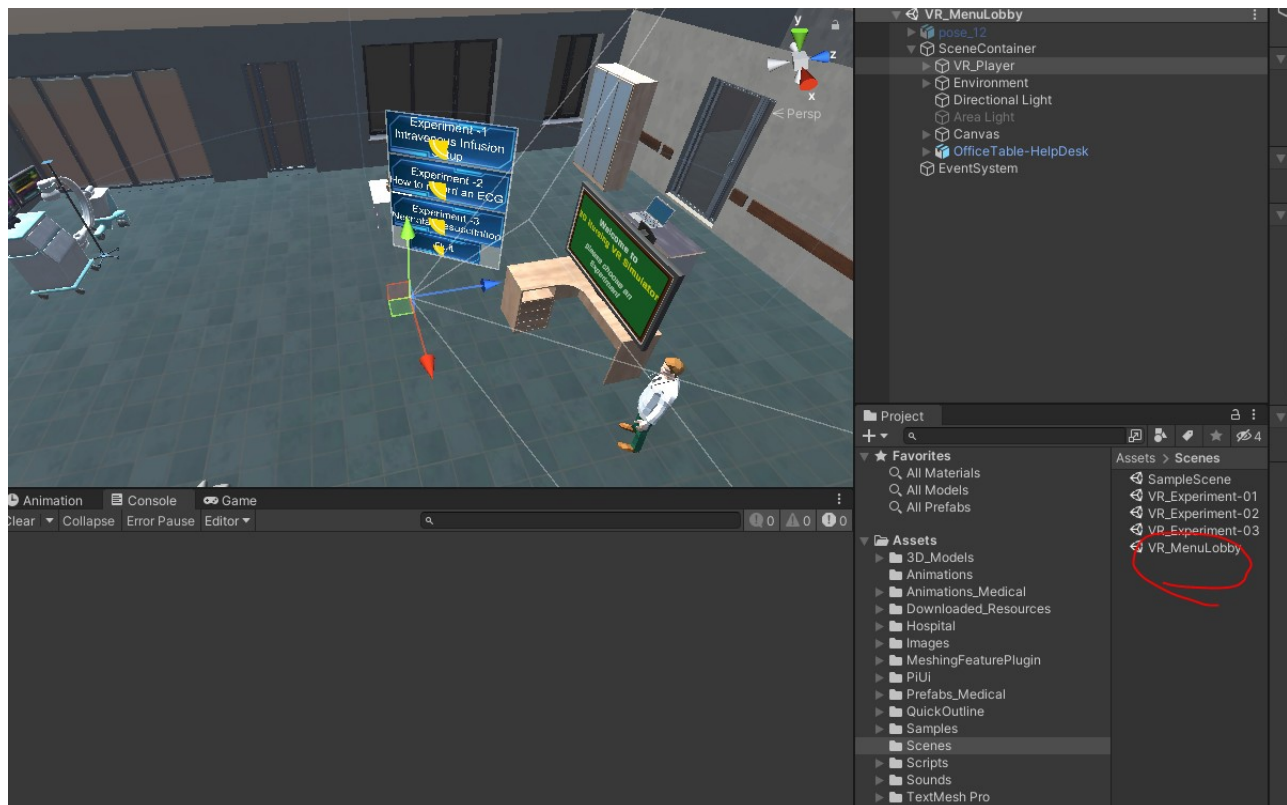

how to test the project

the project can be tested in one of the following 2 options:

1. using unity project source

2. using Android Application

Option 1: testing using source code:

1. Clone the project from github

2. use unity 2021.1.26f1 or newer version

3. open the project from the sub-folder: "\Source\Nursing-Sim"

4. open the main scene at "Assets\Scenes\VR_MenuLobby.unity"

5. run the demo

6. to simulator the headset rotation inside unity editor you can use the rotate tool for the object VR-Player

Option 2: testing using Android APK:

1. Install the application APK from path : "Executable-Android APK\N20.apk"

2. open the application NursingSimulator2 using android mobile

3. put the mobile device inside a mobile headset

4. the application is gaze based (ie. it uses eye direction to select action), to select any action keep looking at it for about 2 seconds till the yellow circular progress completes
